The sample code for **navbar** which I copied from the the documentation page of **bootstrap v5.0** is not working when I'm testing it in my own html page.

Yes, I did copied the CSS link:

```
<link href="https://cdn.jsdelivr.net/npm/bootstrap@5.0.0-
beta3/dist/css/bootstrap.min.css" rel="stylesheet" integrity="sha384-
eOJMYsd53ii+scO/bJGFsiCZc+5NDVN2yr8+0RDqr0Ql0h+rP48ckxlpbzKgwra6"
crossorigin="anonymous">
```

Plus all the other three JS links too.

```
<script src="https://cdn.jsdelivr.net/npm/bootstrap@5.0.0-
beta3/dist/js/bootstrap.bundle.min.js" integrity="sha384-
JEW9xMcG8R+pH31jmWH6WWP0WintQrMb4s7ZOdauHnUtxwoG2vI5DkLtS3qm9Ekf"
crossorigin="anonymous"></script>

<script src="https://cdn.jsdelivr.net/npm/@popperjs/core@2.9.1/dist/umd/popper.min.js"
integrity="sha384-SR1sx49pcuLnqZUnnPwx6FCym0wLsk5JZuNx2bPPENzswTNFaQU1RDvt3wT4gWFG"
crossorigin="anonymous"></script>

<script src="https://cdn.jsdelivr.net/npm/bootstrap@5.0.0-
beta3/dist/js/bootstrap.min.js" integrity="sha384-
j0CNLUeiqtyaRmlzUHCPZ+Gy5fQu0dQ6eZ/xAww941Ai1SxSY+0EQqNXNE6DZiVc"
crossorigin="anonymous"></script>
```

Here's the code sample which I used:

```
<nav class="navbar navbar-expand-lg navbar-light bg-light">
  <div class="container-fluid">
    <a class="navbar-brand" href="#">Navbar</a>
    <button class="navbar-toggler" type="button" data-bs-toggle="collapse" data-bs-
target="#navbarNav" aria-controls="navbarNav" aria-expanded="false" aria-label="Toggle
navigation">
        <span class="navbar-toggler-icon"></span>
    </button>
    <div class="collapse navbar-collapse" id="navbarNav">
      <ul class="navbar-nav">
        <li class="nav-item">
          <a class="nav-link active" aria-current="page" href="#">Home</a>
        </li>
        <li class="nav-item">
          <a class="nav-link" href="#">Features</a>
        </li>
        <li class="nav-item">
          <a class="nav-link" href="#">Pricing</a>
        </li>
        <li class="nav-item">
          <a class="nav-link disabled" href="#" tabindex="-1" aria-
disabled="true">Disabled</a>
        </li>
      </ul>
```

```
        </div>
      </div>
    </nav>
```

And here's the documentation page link

Can anyone help me how to fix it?

html   css   twitter-bootstrap   navbar

I was checking the issue and found that you have multiple links for javascript.

3   Please delete the Popper.js and bootstrap.min.js scripts. When you are using the Bundle you
don't need to include them.

> Bundle Include every Bootstrap JavaScript plugin and dependency with one of our
> two bundles. Both bootstrap.bundle.js and bootstrap.bundle.min.js include Popper for
> our tooltips and popovers. For more information about what's included in Bootstrap,
> please see our contents section.

So that means you just need to leave the CSS and this line

```
<script src="https://cdn.jsdelivr.net/npm/bootstrap@5.0.0-
beta3/dist/js/bootstrap.bundle.min.js" integrity="sha384-
JEW9xMcG8R+pH31jmWH6WWP0WintQrMb4s7ZOdauHnUtxwoG2vI5DkLtS3qm9Ekf"
crossorigin="anonymous"></script>
```

Here is the sample. Please note that in resources I just used the CSS and the Bundle. After
doing those corrections it should start working normally.

Thanks for this answer. I was having the same issue in React. For anyone having similar problem using
React, add `import 'bootstrap/dist/js/bootstrap.bundle'` to your **index.js** file – John Mar 11 at
